## SUMMARY:

"I'm passionate about building scalable and efficient web applications using the MERN stack (MongoDB, Express.js, React, Node.js). My expertise lies in developing dynamic, user-friendly interfaces and robust backend systems. Additionally, I enjoy solving data structures and algorithms (DSA) problems, which enhance my problem-solving skills and deepen my understanding of computational concepts. I'm always eager to tackle challenging projects."

## PROJECTS:

**Mystery Message-Next.JS** | Tailwind CSS, React.JS, TypeScript, NextJs, MongoDB |

Built a secure anonymous messaging and feedback platform using Next.js, TypeScript, and MongoDB.

Enabled users to send feedback or responses, which are stored in the recipient's profile.

Integrated a verification/acceptance system, ensuring messages remain private until approved by the recipient.

Designed with a scalable backend and responsive frontend, ensuring smooth performance across devices.

**Education Platform-LearningDisco** | HTML, CSS, JavaScript |

It includes HTML, CSS, JAVASCRIPT and MERN (MongoDB, Express.js, React, Node.js). It is an innovative edtech platform, I crafted an intuitive, user-centered interface that enhances the learning experience for users.

### **ChatGPT-style Frontend (LLaMA API Integration)**

Developed a ChatGPT-inspired frontend using React.js.

Integrated with the LLaMA API to fetch and display AI-generated responses.

Designed a clean, responsive chat interface with conversation history and smooth UX.

Focused on creating a lightweight, user-friendly AI chatbot frontend.
